Projects
Drink and Dine | https://github.com/moonlagoon/Drink-and-Dine | https://moonlagoon.github.io/Drink-and-Dine/
My role: To design the project with Bootstrap and CSS | make Javascript functions | Making the application Mobile friendly.

> *Single-page web app for food and drink recipes. Apply one ingredient to review several recipes for quick ideas with what you have.*

- Takes one recipe you apply and gives your various recipes for both food and drink.
- Utilizes Bootstrap, API, Firebase, and Jquery queries to create a live search and filter feature.
- Integrates food and drink API as an interactive component that functions as an ingredient-based filter.

Night Beat| https://github.com/moonlagoon/nightbeat | https://agile-sands-50441.herokuapp.com/
My role: To design the project with Reactstrap and CSS | make Javascript functions in React | Setting up new pages and frameworks | Making the application Mobile friendly

> *Multi-page third party sales sneaker bot web application to purchase limited brand sneakers and get the earliest release.*

- Log into your profile through authentication feature Passport to get started.
- Utilizes Reactstrap, Express, API, axios, and bcryptjs to create a live search and filter feature.
- Uses Sequelize and to store all data into database for the web application.

Education
University of Central Florida, Orlando, FL - Full Stack Web Development Certification (May 2019)

Reynoldsburg High School, Reynoldsburg, OH - High School Diploma (May 2016)
